Description

TITAN™

TITAN V2 Basic Module – the best if you long for having TITAN in two or more airsoft guns. Then you do not need the second USB-Link from the Advanced set. It includes TITAN with **BASIC** firmware edition.

The BASIC firmware edition is an **economic version** with limited number of functions, dedicated for those who prefer simplicity but require highest quality. If you decide to have more functions, there is always option to [upgrade firmware from BASIC to ADVANCED or EXPERT](#).

Kit contents:

1. TITAN V2 with BASIC firmware edition (rear or front wired)
2. Installation Kit
3. Quickstart Guide

NOTICE! In order to configure TITAN, you need the USB-Link or Tactical Programming Card which is not included in this kit.

TITAN V2™ is an AEG Control System for V2 gearboxes which will transform your AEG into an advanced training weapon. Adjust your AEG using USB-Link and GATE Control Station App for PC, Mac and Android devices. Gain a tactical advantage thanks to the extremely fast trigger response, option of adjusting trigger sensitivity to your preferences and many other useful functions. Give your AEG a new lease of life!

Thanks to the optical sensors, we eliminated the problem of faulty switches that can occur in competitors' drop-in MOSFETs. The trigger has no mechanical connections with the PCB. This eliminates mechanical stresses and provides for high reliability.

Please note that material and colour of insulation washers included in the kit may differ between different batches.

Warning!

GATE does not guarantee the compatibility of mosfets and ETUs such as TITAN or ASTER with brushless motors. Connection of a brushless motor can cause immediate damage to the device, motor and battery, that is not covered by the warranty and can lead to a fire.
